These forward-looking statements reflect our current views with respect to, among other things, future events and our financial performance. These statements are often, but not always, made through the use of words or phrases such as "may", "might", "should", "could", "predict", "potential", "believe", "expect", "continue", "will", "anticipate", "seek", "estimate", "intend", "plan", "projection", "would", "annualized" and "outlook", or the negative version of those words or other comparable words or phrases of a future or forward-looking nature. These forward-looking statements are not historical facts, and are based on current expectations, estimates and projections about our industry, management's beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, we caution you that any such forward-looking statements are not guarantees of future performance and are subject to risks, assumptions, estimates and uncertainties that are difficult to predict. Use of Non-GAAP Financial Measures

Return on average tangible assets, return on average tangible stockholders' equity, tangible book value per share and tangible stockholders' equity to tangible assets are non-GAAP financial measures. We believe that these measurements are useful for investors, regulators, management and others to evaluate financial performance and capital adequacy relative to other financial institutions. Although these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our results or financial condition as reported under GAAP. Investors should consider our performance and capital adequacy as reported under GAAP and all other relevant information when assessing our performance and capital adequacy.

Table 14 at the end of this document provides a reconciliation of these non-GAAP financial measures with their most directly comparable GAAP measures.

⁽²⁾ Return on average tangible assets, return on average tangible stockholders' equity, tangible book value per share and tangible stockholders' equity to tangible assets are non-GAAP financial measures. We compute our return on average tangible assets as the ratio of net income to average

tangible assets, which is calculated by subtracting (and thereby effectively excluding) amounts related to the effect of goodwill from our average total assets. We compute our return on average tangible stockholders' equity as the ratio of net income to average tangible stockholders' equity, which is calculated by subtracting (and thereby effectively excluding) amounts related to the effect of goodwill from our average total stockholders' equity. We compute our tangible book value per share as the ratio of tangible stockholders' equity to outstanding shares. Tangible stockholders' equity is calculated by subtracting (and thereby effectively excluding) amounts related to the effect of goodwill from our total stockholders' equity. We compute our tangible stockholders' equity to tangible assets, each of which we calculate by subtracting (and thereby effectively excluding) the value of our goodwill.
